Product Application

AFA dual flap wafer check valve is engineered designed specially to act as the automatic shut off/ non -return valve when the systems stop, to prevent backflows of the systems which the pump equipment & piping filled. These valves are normally installed on the discharge side of the pump, equipment, as well as piping system.

AFA wafer check valves are suitable for use with water, warm water, sea water, air & weak acid. AFA wafer check valves are widely used in the following industries.

BUILDING INDUSTRIES
~HVAC System
~Plumbing / Sanitary Services
~Fire Fighting Protection
~Irrigation System

SHIPBUILDING / OIL & GAS INDUSTRIES
~Marine Mechnical System
~Marine Cooling System
